

COFFEE OR NOT DUO

Live information

Updated October 2018

IMPORTANT!

Thank you very much for booking Coffee Or Not!

Would you please read the information contained within the following page and forward them onto the necessary technical people at your venue/festival, in order that it may assist them on the day of the show. Thank you very much. In case of problem, please feel free to get in touch!

- The band requires **60 minutes** to: load in (if the stage has an easy access, no stairs, etc.), build the set up and soundcheck.
- Would you please have the PA ready, up and running properly by the band scheduled arrival time.
- **THE BAND ALWAYS PROVIDES BACKLINE + 1 PRESET MIXER**
- The band always carries its own mixing desk (QSC touchMix-8) and only needs: active speakers (for the public): **the musicians send their left and right mix to your speakers (XLR)**. *For big venues only: 2 stage monitors*
- The two musicians use in-ear monitors, connected to their QSC touchMix
- The QSC touchMix is located on stage, close to the musicians.

Coffee Or Not – Patch

In black: things we amplify with our microphones, stands and mixer, sent from our mixer to your speakers (left/right)

In blue: drum's elements we don't usually amplify (unless if the venue is too big) and don't have the mics and stands for it.
